PATRICE OYENDE

Full Stack Developer | Software Engineer | Web & Mobile Developer

Nairobi, Kenya • abellepatrice@gmail.com • patrice.abelle.site • github.com/abellepatrice • linkedin.com/in/patriceoyende

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience architecting and shipping scalable web and mobile applications across fintech, health tech, service management, and travel sectors. Founder of AbelleGroup, a software development studio delivering SaaS-oriented digital products for startups and growing businesses. Proficient across the entire development stack — from responsive React/Next.js frontends and React Native mobile apps to Node.js/NestJS/Flask backends, RESTful APIs, and PostgreSQL/Supabase/MongoDB database systems. Combines strong product thinking with security-first architecture practices (KDPA 2019 compliance, RLS access control) to build systems that are secure, maintainable, and built to scale.

WORK EXPERIENCE

Developer — Clover (Human Squared Health) — January 2026 – April 2026 | Remote

- Developed and maintained full stack features across web and mobile surfaces using NestJS, Next.js, Flutter, and Dart within an agile sprint-based workflow.
- Built and integrated RESTful APIs connecting frontend clients to backend services, maintaining reliable data flow, validation, and error handling practices.
- Contributed to cross-platform application functionality focused on performance, usability, and responsive user experiences.
- Collaborated with product and design teams to translate UI mockups into responsive, production-ready interfaces using Tailwind CSS.
- Improved application performance and system reliability through debugging, optimisation, and refinement of backend data access patterns.
- Participated in code reviews, testing workflows, and technical documentation to maintain engineering standards and codebase quality.
- Supported staging and production deployment workflows, monitored application stability, and resolved post-release issues.

Founder & Lead Developer — AbelleGroup — January 2024 – Present | Nairobi, Kenya

- Founded and lead AbelleGroup, architecting and shipping 6+ production-grade web and mobile applications across fintech, e-commerce, service management, and travel.
- Designed full-stack architectures using React, Next.js, React Native, Node.js, and Express, implementing role-based access control (RBAC) and JWT authentication.
- Integrated regional and global payment systems including M-Pesa Daraja (STK Push) and Paystack, handling webhook verification and resilient transaction flows.
- Managed end-to-end product lifecycles from ideation and schema design to CI/CD deployments on Vercel, Render, and PythonAnywhere.

FEATURED HEALTH TECH PLATFORM

DTLC Health Partner App — Chronic Illness & Wellness Platform (Diabesity Nutrition Centre) — Contract · Health Tech

Tech: `React Native` `Expo` `TypeScript` `Node.js` `Express` `Supabase` `KDPA 2019`

- Built the cross-platform chronic illness and wellness mobile application from scratch for iOS and Android.
- Engineered clinical biomarker calculators for diabesity, blood pressure staging, BMI (metric/imperial toggle & comorbidity risk), blood glucose, and lipid profiles.
- Conducted comprehensive end-to-end security auditing; implemented strict Row-Level Security (RLS) data isolation and zero-retention session logout data wiping aligned with Kenya Data Protection Act (KDPA 2019).
- Built and verified push notification pipelines via Expo for medication scheduling, dosage intervals, and daily adherence reminders.
- Implemented health tracking telemetry, clinical PDF audit report exports, and verified API remediation against access control vulnerabilities.

PRODUCTION & CLIENT PROJECTS

AbelleGroup Invoicing System — Multi-Tenant SaaS Billing Platform — SaaS · Fintech

Tech: `React` `Node.js` `Express.js` `PostgreSQL` `Supabase` `TypeScript`

- Architected a multi-tenant invoicing platform supporting independent organisation workspaces, role-based access control, and invoice lifecycle management.
- Designed audit logging and payment tracking systems backed by a normalised PostgreSQL schema with row-level security via Supabase.
- Implemented automated invoice sequencing, PDF generation, and API-first architecture to support future mobile integrations.

Clover TODO App — Cross-Platform Task Management Application — github.com/abellepatrice/TODO

Tech: `NestJS` `Next.js` `Flutter` `TypeScript` `Dart` `Node.js`

- Built a full-stack task management application featuring a NestJS backend, a Next.js web interface, and a Flutter mobile app.
- Implemented task creation, editing, completion tracking, and synchronised user workflows across web and mobile platforms.
- Designed RESTful API endpoints and managed frontend-backend integration to deliver a consistent cross-platform user experience.

Roaring Lion Tours & Travel — Client Travel Booking Portal (Live Production) — abellepatrice.pythonanywhere.com

Tech: `Python` `Flask` `React.js` `Bootstrap` `MySQL` `PythonAnywhere`

- Built a full-featured travel website for a client tourism company, delivering tour package listings, itinerary pages, online booking functionality, destination galleries, and contact systems.
- Deployed the platform to PythonAnywhere with custom routing, template rendering, and form validation — live in production.

Speedy Spanners — Garage & Vehicle Service Management Platform — Service Management · Android

Tech: `React` `Node.js` `Express.js` `MongoDB` `Kotlin` `Android Studio`

- Engineered a garage management system handling repair workflows, customer records, service booking, and payment tracking.
- Developed an Android (Kotlin) companion application integrating with the Express.js backend via REST APIs for operational support.

Loan Management System — Fintech Lending Platform — github.com/abellepatrice/AbelleGroup

Tech: `Node.js` `React Native` `MongoDB` `TypeScript` `REST APIs`

- Built individual and group loan workflows with admin approval queues, repayment scheduling, and loan analytics dashboards.
- Integrated a React Native mobile frontend with backend APIs, enabling borrowers to apply for and monitor loans from mobile devices.

Elite Shop — E-Commerce Platform — E-Commerce

Tech: `Next.js` `Supabase` `Tailwind CSS` `TypeScript` `Node.js`

- Developed a secure e-commerce platform with admin-only product management, authentication workflows, shopping cart, and purchase flows.

OPEN SOURCE & REUSABLE TOOLS

PDF Kit — Reusable Document Generation Utility — github.com/abellepatrice/pdf-kit

Tech: `Python` `FPDF` `Automation` `CLI Tool`

- Lightweight Python utility for converting arbitrary text into formatted, downloadable PDF documents.
- Features both CLI automation (`pdf.py`) and web interface scripts (`app.py`) designed for drop-in reuse across backend document export pipelines.

DataCount — Real-Time Telemetry & Network I/O Logger — github.com/abellepatrice/datacount

Tech: `Python` `psutil` `Network I/O` `CLI Tool`

- Reusable system network traffic monitor and I/O telemetry logger for developer workstations and Linux servers.
- Continuously tracks network interfaces, calculates cumulative bytes sent and received, prints real-time updates, and logs daily bandwidth data to CSV.

Flask E-Commerce Starter — Modular E-Commerce Backend Boilerplate — github.com/abellepatrice/e-commerce

Tech: `Python` `Flask` `MongoDB` `REST API` `JWT`

- Modular, reusable e-commerce backend template built with Flask and MongoDB, pre-configured with user authentication, product catalog, and order management endpoints.

Cineverxe — Movie Discovery Platform — github.com/abellepatrice/Cineverxe

Tech: `Next.js` `TypeScript` `Tailwind CSS` `REST API`

- Built an open-source movie discovery platform integrated with an external movie API, featuring title browsing, cast details, ratings, and user watchlists.

TECHNICAL SKILLS

FRONTEND	React, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap
BACKEND	Node.js, Express.js, NestJS, Flask (Python), PHP, Laravel, RESTful APIs
DATABASES	PostgreSQL, Supabase (RLS, Auth, Storage), MongoDB, MySQL, Firebase, Microsoft SQL Server
MOBILE	React Native, Expo Router, Flutter, Dart, Kotlin, Android Studio
DEVOPS & TOOLS	Git, GitHub, Vercel, Render, PythonAnywhere, Docker, Postman, Insomnia, VS Code, Ngrok
CONCEPTS	REST API Design, Authentication & Authorization, Row-Level Security (RLS), Role-Based Access Control (RBAC), Multi-Tenant Architecture, Database Schema Design, Responsive UI/UX, Cybersecurity Fundamentals, Agile / Scrum

EDUCATION

Advanced Certificate in Full Stack Development (MERN) May 2024 – August 2024
Modcom Institute of Technology — Nairobi, Kenya
Specialised in MongoDB, Express.js, React.js, Node.js, React Native, and TypeScript.

Certificate in Software Development January 2024 – May 2024
Modcom Institute of Technology — Nairobi, Kenya
Covered HTML5, CSS3, Python, Flask, SQL, and Android App Development using Kotlin.

Cybersecurity — Self-Directed Study & Coursework Ongoing
Nairobi, Kenya
Focused on Ethical Hacking, Network Security, Secure Application Development, and Cybersecurity Fundamentals.

CERTIFICATIONS & ACHIEVEMENTS

Building Software (End-to-End) — Certificate of Completion August 18, 2025
Udemy | Instructor: Cornelius Tonui
Certificate No: `UC-82f8fb90-524d-431e-8f0d-b2f62069c772` | Credential: ude.my/UC-82f8fb90-524d-431e-8f0d-b2f62069c772

- Completed practical coursework focused on software development workflows, application architecture, and end-to-end system development.

Key Professional Achievements:

- **Founder & Lead Developer, AbelleGroup:** Architected, built, and deployed 6+ production-grade web and mobile applications across fintech, health tech, e-commerce, travel, and service management sectors.
- **Client Production Deliveries:** Successfully delivered and deployed Roaring Lion Tours & Travel as a live, operating client-facing production system.
- **Security & KDPA 2019 Auditing:** Delivered full security audit scoping, Row-Level Security (RLS) data isolation, and verified remediation against API vulnerabilities on production mobile health and fintech applications.
- **Open-Source Tooling:** Authored reusable developer utilities and telemetry libraries (PDF Kit, DataCount, Flask E-Commerce Starter, Cineverxe) active on GitHub.
